

Is a GoldSeal™ CT tube the right **replacement** strategy for you?

GoldSeal tubes can be a smart replacement option to help extend your system life without draining your budget.

Optimize utilization and budgets

CT tube replacements require careful consideration. If you are repairing a system that has been designated for an approaching trade-in or wish to ensure a low-usage system is ready when needed, a GoldSeal tube may be the answer. Our Performix™ Ultra CT tubes are harvested and tested by GE Healthcare engineers to provide quality GoldSeal tubes that meet every need and budget.

GoldSeal CT tubes for consistent quality and value

- Designed to fit your need and budget—our harvested tubes are priced based on usage levels
- Tested by a GE engineer on a GE system to ensure full functional operation, ready to calibrate and produce quality images
- Harvested and tested in facilities using an ISO13485 certified quality system
- Covered by a 90-day warranty from date of delivery
