SIGNA™Works 26.0 Upgrade
Order Guide

Welcome to the SIGNA™Works 26.0 software upgrade guide. Please use the steps and information below to configure the appropriate upgrade from your current equipment to the latest performance of SIGNA™Works 26.0 software version.

If you are a 32-channel system user, select from the Bundled Catalogs or follow the Configuration Steps below. If you are a 16-channel system user, you must follow the Configuration Steps.

Bundled Catalogs

If you want the latest technology available, you can also select a pre-bundled upgrade from the list below which will provide all items available.
